

## OFICIAL COMMUNICATION

### **RELEVANT INFORMATION CONCERNING COVID-19 IN SALINAS**

Following the plan and protocol drawn up by this City Council to prevent and detect COVID-19 in the population of Salinas, **today we have received the results** of the analysis carried out last Monday in the different sampling points of the sewerage system of our town.

These results have **been positive in the detection of virus chains in our town**, although taking into account the results of last week in the different sectors and samplings of our municipality, we can affirm that the presence of virus chains **has been detected in the residential part of the town**, this time being negative for the industrial area "La Noria". **For all this, we report the presence of the virus in Salinas.**

The results of these tests **have been sent to the Health Authorities** so that they can analyze the viral load of the samples and serve as a support for the monitoring and performance of PCR tests (swab tests) of possible **people who could be positive**, but as of today **there are no positive cases** resulting from these tests and monitorings in Salinas, although there are several people in quarantine waiting for these test results.

Therefore, **the situation is similar to that of last Monday**, August 31st, and this City Council, together with the Health Authorities, has put in place all the necessary protocols, closing relevant municipal facilities, suspending all activities, and reinforced cleaning and disinfection works in public spaces and has recommended to the all sectors of our population, if possible, to **postpone meetings or situations that may involve a significant concentration of people**. All this until the extent of the situation is known.

The Public Health Department **keeps transmitting us a message of tranquillity and patience** until the results of the tests that are being carried out are known, which will give us an image of the magnitude of the situation and thus, act accordingly.

Remember that in case you experience any symptom (**fever, diarrhea, lack of taste or smell, persistent dry cough or breathing difficulty**) you must contact the Health Authorities through the **Health Center of Sax (966 957 000)** or through the Generalitat Valenciana's phone number **900 300 555**.

**SALINAS, SEPTEMBER 4, 2020**
