

OFICIAL COMMUNICATION

RELEVANT INFORMATION CONCERNING COVID-19 IN SALINAS

Following the plan and protocol drawn up by this Town Council with regard to the prevention and detection of COVID-19 in Salinas, today we received information from the Health Authorities about the impact of the virus in the municipality of Salinas.

There are currently 6 active cases of COVID-19 in our municipality. These cases are fully controlled, being monitored by the Health Authorities and under quarantine. According to the information received by this Town Hall, from the Health Authorities, **all the protocols are being applied and possible cases that could arise are being traced, but to date the possible related cases have turned out to be negative.**

From this Town Council **we would like to thank the information received from the Health Authorities**, and above all we would like to thank those affected, because we were informed about the situation from the first moment. **This has helped us to be able to coordinate the work** with the Health Authorities much better and to apply the different protocols and means established to date, in the most efficient way possible.

In the next few days **tests and analyses will be carried out on our town's sewerage system**, in order **to quantify the incidence of the virus by area and the viral load of the same**, in accordance with the frequency of sampling recommended to us by the Health Authorities.

Public Health authorities **send us a message of tranquillity** and patience, as the situation is under control and they indicate that, for the moment, **it is not necessary to apply extraordinary measures in our municipality, as long as the situation does not change**.

Our Public Health department send us a message of prudence and responsibility, strongly complying with all the rules and restrictions established to date. **It is heavily recommended that we avoid as much as possible unnecessary social gatherings and travel**, considering the delicate situation in some of the surrounding towns and cities.

Remember that in case you experience any symptom (**fever, diarrhea, lack of taste or smell, persistent dry cough or breathing difficulty**) you must contact the Health Authorities through the **Health Center of Sax (966 957 000)** or through the Generalitat Valenciana's phone number **900 300 555**.
